Vassiliou (GR-NET)**

Session dedicated to synergies across HE Cluster 1 and EU4Health/Digital Health GR-HDAB

European Health Data Space (EHDS) - Secondary use of health data

Session dedicated to synergies across HE Cluster 1 and EU4Health/Digital Health GR-HDAB

Project name: Greek Health Data Access Body Infrastructure

Project acronym: GR-HDAB

Topic: EU4H-2022-DGA-MS-IBA-4

Start: December 2023 - **Duration:** 4 years

Funding: ~1.800 mi euro.

- The main objective of the project is to support MoH GR's efforts to establish a Health Data Access Body, to support the provision of services towards the secondary use of digital health data (EHDS), as well as the connection of the Health Data Access Body with the HealthData@EU Network.

Session dedicated to synergies across HE Cluster 1 and EU4Health/Digital Health GR-HDAB

Objectives:

Setting up national services and infrastructures:

Setting up the health data access body and providing services and infrastructures to allow the interaction between the health data access body, data holders, and data users. The services and infrastructures shall allow:

- The health data access body to **receive, process and reply to data access applications**
- The health data access body to **provide access to data users to discoverable and accessible catalogues of metadata health datasets**
- The health data access body to **provide access to secure processing environments**

Setting up cross-border services and infrastructures:

Setting up a digital gateway for the health data access body to participate in the cross-border infrastructure for secondary uses of health data (HealthData@EU), by ensuring:

- **The connection of the health data access body to entities authorised to participate in the infrastructure for secondary uses of health data across borders**
- **The connection of the health data access body to the central services provided by the Commission.**
